Standards Australia has finally released the new Australian Standard AS1288-2006 - Glass in buildings which replaces "AS1288-1994 - Glass in buildings". As it has been twelve years between editions it seems appropriate to analyse the impact this may have on the glass and glazing industry.

AS1288-2006 Review: The New Standard in Glass
AS1288-2006 is the Australian standard which determines the glass types and glass thickness requirements for all buildings across the country. Adherence to AS1288-2006 implies that we often need to use thicker glass for our large windows and doors. We constantly refer to the following table which describes maximum areas for safety glass (for fully framed windows and doors).

Glass thickness requirements - AS1288 - Nu-Line Windows
01/16/2006 ISBN(s): 0733770967 Number of Pages: 137 File Size: 1 file , 2.1 MB Product Code(s): 10092548, 10092569, 10092594 Document History. AS 1288-2006 currently viewing. January 2006 Glass in buildings - Selection and installation

AS 1288-2006 - Techstreet
AS1288 - 2006 sets out data and procedures for determining glass types and thickness requirements for all buildings and is referenced in the Building Code of Australia 2006. Glass strength requirements are given for glazing based on the tensile stresses developed on the surface of the glass.
