Statistical analysis is also an example of a quantitative technique. Quantitative techniques are applied for business analysis to optimize decision making IE profit maximization and cost minimization. It covers linear programming models and other special algorithms, inventory and production models.

A lot of quantitative business data is derived from business surveys and questionnaires. One of the main goals of quantitative business methods is to find a way to make corporations more efficient using principles of economics and mathematical strategy. It is a way of giving numeric value to human output and determining the best
