Gy6 Engines

The GY6 engine design is a four-stroke single-cylinder in a near horizontal orientation that is used on a number of small motorcycles or scooters made in Taiwan, China, and other southeast Asian countries. It is believed to have originally been a Honda design. At some stage Honda used Kymco, a Taiwanese company, as a factory for Honda bikes.

Gy6 engines are most commonly used in motor scooters, although they are also installed in some motorcycles and ATVs. The origin of the gy6 engine, and even the meaning of the term "gy6," is mired in mystery. Some people believe that Japanese automobile/motorcycle manufacturer Honda came up with the design in the 1980s.

gy6 250cc engine for sale | eBay

Though the history of the GY6 motor specification is anything but clear, traditionally the design has been attributed to Honda engineers working to create an efficient and resilient engine in 1980. Those anonymous engineers succeeded spectacularly, as the GY6 engine sees use today on a wide variety of applications.
