### Hot And Bothered Case Study

Abstract. This interrupted case study is a story about Carrie and her infant daughter Hayden who share similar symptoms: weight loss, metabolic abnormalities, and endocrine glands that just won't quit - as well as autoimmune complications. Students will eventually determine that Graves disease is the underlying condition; however, the point of the story is less about the diagnosis and more about understanding the complex interplay of receptor, ligand, and feedback loops as well as how this ...
