Studies in macroeconomic theory / 2. Redistribution and ...

The long-standing redistribution hypothesis, 1 derived from the Meltzer and Richard (1981) model, assumes a close association between actual economic inequality and redistribution. This theory presupposes that increasing market inequality leads to more demand for redistribution, thereby resulting in more redistribution; however, the posited mechanism that support for redistribution links inequality to redistribution has not been fully clarified or explored in previous studies.

Revisiting the redistribution hypothesis with perceived ...

We study how inequality affects redistribution behavior in a randomized “give-or-take” experiment that created equality, advantageous inequality, or disadvantageous inequality between two individuals before offering one of them the opportunity to either take from or give to the other.

of market imperfections, thus making a case for redistribution (Aghion, Caroli, and Garcia-Penalosa, 1999; Galor and Ziera, 1993).

Insisting on equity: A redistribution approach to education

Macroeconomics is the branch of economics that studies the economy as a whole. Macroeconomics focuses on three things: National output, unemployment, and inflation.

Explaining the World Through Macroeconomic Analysis

Macroeconomics is the study of economies on the national, regional or global scale. This key difference alters how the two approach economic situations. Microeconomics does consider how macroeconomic forces impact the world, but it focuses on how those forces impact individual firms and industries. While macroeconomists study the economy as a ...
