The Square And The Tower

From the cults of ancient Rome to the dynasties of the Renaissance, from the founding fathers to Facebook, The Square and the Tower tells the story of the rise, fall and rise of networks, and shows how network theory--concepts such as clustering, degrees of separation, weak ties, contagions and phase transitions--can transform our understanding of both the past and the present.

In both the Introduction to and the Afterword following the meat of The Square and the Tower, author Niall Ferguson invokes the image of the Piazza del Campo in Siena, Tuscany - a medieval square that hosts informa

The Square and the Tower: Networks and Power, from the ...

The Square and Tower: Networks, Hierarchies and the Struggle for Global Power is a book by Niall Ferguson, published in 2018 by Penguin Books, where he explains how those at the top of the towers of power have been overstated and the influence of "the social networks down below, in the town squares" has been underestimated. His aim is to highlight and correct this historical oversight.
